Subject: Support for Lighting Code Update

Dear Supervisors Call, English, and Searle:

I was planning on attending your next board meeting on Tuesday to speak in favor of the proposed light pollution code update. Unfortunately, some family issues prevent me from attending in person, so I am attaching a digital copy of my letter of support. I hope you will be able to join the planning commission in moving this much needed update forward. We need your approval.

In brief, the recent changes approved unanimously by the Cochise County Planning Commission are right on target. Without an outright ban on digital signs, the code allows digital signs in such a way as to preserve our night skies. The correlated color temperature limit is needed for potential LED commercial grade lighting installations. Please pass our appreciation to the planning commission and staff for their continued good work on this complex subject.

Thank you for your time and for your service on the board of supervisors.

Respectfully,

Bob Gent
